

Mobile App Developer

There's an evolution happening in Avon, CT. iDevices, the preeminent consumer tech brand in the connected home industry, is growing a line of smart home products available at the largest retailers worldwide. We are creating "The Silicon Valley in the Farmington Valley" – so if you thrive at the intersection of Technology and Engagement then we want you to join our evolution.

iDevices is seeking a Mobile App Developer who has experience through multiple complete app launch cycles. We are seeking an individual who has excellent technical, problem solving and communication skills. The individual should also have a passion for delivering new features, as well as operating the current applications at the highest level of quality and ensuring that our customers have a top-of-line experience on their mobile device.

iDevices needs a world class Mobile App Developer to launch app-enabled products on a variety of platforms. This role requires working closely with product management and creative teams to define strategy and requirements. This individual will work with the development teams from design through delivery and subsequent operation. The position involves regular communication with your senior management on status, risks and product strategy. Excellent listening and writing skills and very strong technical competencies are essential.

Responsibilities:

- Provide technical support to teammates
- Maintain high standards of software quality
- Collaborate with other software developers, creative team, embedded software developers and electrical engineers to plan, design, develop, test and maintain mobile applications built for iOS and Android
- Assist in the collection and documentation of user's requirements, development of user stories, estimates and work plans
- Prepare reports, manuals and other documentation on the status, operation and maintenance of software
- Design, develop and unit test applications in accordance with established standards
- Work with teammates in the migration of applications to latest OS releases
- Analyze and resolve technical and application problems
- Adhere to high-quality development principles, while delivering solutions on time
- Research and evaluate a variety of software products

Key Qualifications:

- Bachelor's degree in Computer Science, Software Development, Information Technology or related experience
- 5+ years application development with C/C++, Objective-C or Java
- 2+ years experience developing mobile applications for iOS and/or Android

- Solid understanding of object-oriented programming (OOP) and computer science foundations
- Strong knowledge of software implementation best practices
- Expertise with version control (i.e. SVN)
- Cloud development, integration & implementation are a plus

Additional Qualifications Include:

- Position requires a professional level understanding of iOS and/or Android platforms
- Experience with app-enablement is strongly preferred, but not required.
- Experience with Bluetooth, Bluetooth Smart (4.0) and Wi-Fi is strongly preferred

This is a full-time, on-site position. Candidates requiring visa sponsorship and/or relocation are not being considered at this time.

Additional Information:

Type: Full-time

Industries: Consumer Electronics

Compensation: Salary, 401K, Health, Disability, Bonus, Equity, PTO

Relocation assistance not offered.
